

Livestock Protection Tools Field Day

Willow Creek Ranch – Susanville, CA

July 23, 2019 ★ 9:30 a.m. – 2:30 p.m.

\$15 per person (includes lunch and materials)

RSVP at <http://ucanr.edu/livestockprotectionfieldday>

Registration deadline: July 19

Predator management as it relates to range and pasture livestock grazing is an increasingly complex topic. How do modern livestock protection tools work, and how do protection strategies fit into the broader context of livestock production systems and natural resource management?

Join UCCE and local ranchers for this hands-on field day (lunch included). See hands-on demos, hear about strategies used in other states, and participate in discussions of what we can do collectively to reduce livestock-predator conflicts in northeastern California.

Hands-on demos will include setting up and troubleshooting turbo fladry, temporary and permanent electric fencing, and alarm devices. UCCE experts will also provide information on livestock guardian dogs and carcass disposal programs. We'll wrap up the workshop with a presentation on compensation programs, a panel discussion on the importance of relationships and communication in dealing with livestock-predator conflicts, and a discussion on future research/outreach needs.
