

A Further Update on the Nomenclature and Typification of *Sabal yapa* (Arecaceae)

Una Actualización Adicional Sobre la Nomenclatura and Tipificación de *Sabal yapa* (Arecaceae)

CELIO E. MOYA- LÓPEZ

Dr. Rafaël Govaerts, a plant names expert at Royal Botanic Gardens, Kew, brought two problems with the nomenclature of *Sabal yapa* to my attention (pers. comm., 13 February, 2023).

According to Dr. Govaerts, I misinterpreted the Code (Turland et al 2018) relating to Note 1 of Article 52 in two articles about *Sabal yapa* (Moya et al. 2021, 2023). When naming *S. yapa*, Beccari (1907) wrote “*Corypha maritima* Humb. et Bonpl. Nov. Gen. et sp. pl. I, 298 ?,” (which is the basionym of *S. maritima*), apparently listing *C. maritima* as a synonym of *S. yapa*, making *S. yapa* a superfluous, illegitimate name. Indeed, I treated (Moya et al. 2021, 2023) the name *S. yapa* C. Wright ex Becc. as such. However, according to Dr. Rafaël Govaerts, Beccari’s placement of the question mark at the end of the phrase implicitly excluded *C. maritima* as a synonym and, thus, the name *S. yapa* C. Wright ex Becc. is not superfluous.

However, *Sabal yapa* C. Wright ex Beccari is incorrect authorship. When naming *S. yapa*, Beccari (1907: 64) attributed the name to “Wright Pl. Cubense no. 3971,” and “Sauvalle Fl. Cubana p. 152.” First, Beccari referred to *S. yapa* C. Wright, in Sauvalle (1871: 562), which is a *nomen nudum* and, thus, can have no ascription of *S. yapa* to C. Wright (Turland et al. 2018, Article 38). Second, Beccari referred to *S. japa* C. Wright in Sauvalle (1873: 152), which is a later isonym, which also eliminates ascription of *S. yapa* to C. Wright. Thus, the correct name and authorship should be *S. yapa* Becc., not *S. yapa* C. Wright ex Becc., the latter how it is typically and currently written (Turland et al. 2018, article 46.4).

Beccari (1907) related various collections without defining a type, thus creating syntypes. Bartlett (1935: 36) published an effective lectotypification statement, “*description ex specimine typico cl. C. Wright, no. 3971, Cuba, in US Nat. herb. No. 33398,*” which fulfills all requirements of Article 7.11 (Turland et al. 2018). Thus, Bartlett’s statement constitutes lectotypification and the remaining 31 duplicates are isolectotypes.

In summary, the correct name and authorship are *Sabal yapa* Becc., Webbia 2: 64. 1907.

Sabal yapa Becc., *Webbia* 2: 64. 1907.
